

Company Profile & Capability Statement

Any Steel Fabrication Pty. Ltd.

67 Capital Link Drive, Campbellfield, Victoria, 3061

An Overview

Any Steel Fabrication is a manufacturing business capable of handling all of facets of engineering. Through the systems employed, we deliver quality products which are both consistent and at a competitive price.

Company History

Any Steel Fabrication is a proudly family owned second generation run business. Established in 1991, the company has rapidly expanded to employing approximately 20 employees, proudly working with many large companies such as Main Freight, Kruger, Lend Lease, Tieman Tankers, APV, AKS Water Systems, Bild Group, and a number of other small to large local to Australia wide businesses.

Any Steel Difference

As a company, we are continuously challenging the status quo in our efforts to make a difference in the engineering industry and to help create a world class manufacturing business.

Our company philosophy has remained the same since our humble beginnings as backyard business transitioning to our current 2650sqm manufacturing facility. The importance of understanding our customers needs and requirements and providing solutions by adding value and ensuring it is fit for purpose is what we pride ourselves on.

All the way from management to our trade qualified team who are highly skilled, determined and engaged, we ensure that our philosophy is enshrined to everyone from the beginning.

We seek to provide our customers with the highest level of service, expertise, and craftsmanship. From concept to design, manufacturing, quality assurance to delivery every stage of the process is highly controlled and accounted for using our unique on-time and above grade system.

Our Equipment
